Dear Reader

For many years, HUBER has been your reliable partner in the field of sludge drying, whether with the [Belt Dryer BT](#) or with the [solar and regenerative sludge dryer SRT](#).

With our new [HUBER Disc Dryer RotaDry®](#), we have completed our product portfolio for sewage sludge drying with a contact dryer. With the different processes we now can provide, we have the possibility to choose the best process for the increasing challenges of sludge disposal.

It is therefore an important milestone for us that the first two HUBER Disc Dryer RotaDry® 2050 M units have recently been lifted into place in the Hannover-Lahe project.

I wish you a Merry Christmas and a good start into the New Year, stay healthy and stay with us!

Georg Huber, CEO

PRODUCTS & SOLUTIONS

HUBER Disc Dryers successfully lifted in

The Hannover-Lahe project of sludge2energy GmbH is running on track! A crane has successfully lifted the two HUBER Disc Dryer RotaDry® 2050 M into place. The showcase project is thus progressing further.
