Dear Reader

At the end of April, I had the pleasure of attending the ceremonial commissioning of the [new sewage sludge drying plant at the Erlangen](#) sewage treatment works in the presence of Bavarian Environment Minister Thorsten Glauber and Dr Florian Janik, Mayor of the City of Erlangen.

Over the past 20 years, more than 100 million euros have been invested in the maintenance, expansion and modernisation of the sewage treatment plant there. Among other improvements, this has resulted in more energy being generated at the plant than it consumes since 2019.

Another milestone has now been reached with the new sludge drying system. We congratulate all those responsible and are proud to have supplied the heart of the new plant with our HUBER Belt Dryer BT 16.

Yours,
Georg Huber

PRODUCTS AND SOLUTIONS

In front of stunning scenery in the middle of the Atlantic: HUBER supplies machines for faecal sludge treatment on the Faroe Islands

HUBER has successfully commissioned a faecal sludge treatment plant on the Faroe Islands. At least 10,000 t of sludge are received annually, screened and then dewatered to $\geq 35\%$ dry residue (DR).
