## HUBER NEWS

EDITION 5 | 2025

Georg Huber,  
CEO

### Dear Mr. Schmid,

This issue once again demonstrates the versatility of our solutions in use around the world.

In New York, HUBER pressure-tight doors protect historic buildings, universities and new urban districts from storm surges – our reliable technology guarantees maximum protection.

In Norway, a mobile HDF rental system ensures that a new fish processing plant can produce in an environmentally friendly manner even before the final infrastructure is in place – flexible, efficient and ready for immediate use.

In Lisbon, our ROTAMAT® systems guarantee the functionality of a gigantic combined sewer tunnel that safeguards the city during periods of heavy rainfall and keeps the Tagus River clean.

Three projects, three challenges, but one goal: making infrastructure more resilient, sustainable and future-proof with technology from HUBER. I hope you enjoy reading!

Georg Huber

## HUBER Projects | Solutions

### Flexible wastewater solution for Norwegian fish processing company

HUBER supplies a mobile flotation plant to comply with environmental standards at the start of production at Måsøval fish farming company in Ulvan. The delivery also includes a Q-PRESS® for sludge dewatering.
