**Dear Reader**

Over 4 billion cubic metres of water are needed every year in the European Union alone for the generation of electricity, which is over 40% of the water consumption in the Community. Most of the required water is extracted from surface waters and has to be purified from pollutants before it can be used as cooling water for thermal power plants. HUBER is expanding its activities in the field of [water extraction to reliably ensure the economical recovery of sea and river water](#) as process and cooling water in a wide range of industries.

Yours sincerely,

Georg Huber

## PRODUCTS AND SOLUTIONS

### **HUBER expands activities in the field of water extraction**

In many respects, water is an indispensable basis of life for humans and nature, because without water there is no life and no economic progress. Increasingly, seawater and river water are being extracted to meet the growing demand.

### **Ideal synergies of ecology and economy: smart HUBER solutions for grit processing in the waste management industry**

Sand and water, as the most important components for concrete production, are a basis of modern society. Due to the growing world population and the ongoing construction boom, both resources are becoming increasingly scarce. Smart solutions from HUBER are designed to remedy this by exploiting synergies of ecology and economy, thus promoting sustainable grit processing in the disposal industry.

### Microfiltration at Constance waterworks modernised with three HUBER Disc Filter RoDisc®

Lake Constance, with a water surface of about 536 km<sup>2</sup> the largest lake in Germany and the largest freshwater reservoir in Central Europe, has been used for the drinking water supply of the city of Constance for more than 110 years. The waterworks provides up to 50 million litres of drinking water daily for the Constance region. For this project, HUBER will renew the entire micro-screening system by mid-2023 and supply three HUBER Disc Filter RoDisc® units.

## GENERAL HUBER NEWS

### 150 years HUBER - company anniversary video

Join us on a journey through the milestones of HUBER's company development: In 2022, the HUBER family celebrated 150 years of successful company and family history - from the construction of one of the first water pipes by the then coppersmith's shop to the projects implemented by HUBER today. One of the thematic brackets has always been the element of water.
