**Dear Reader**

In recent years, we have all had to learn that a reliable and affordable energy supply, and thus also heat, is not something we can take for granted. In addition to saving energy, alternative suppliers can also increasingly contribute to safeguarding the supply.

[The Sewage Sludge Utilisation Plant in Hannover-Lahe](#) supplies around 5,000 households and thus up to 15,000 customers with renewable district heating and is consequently replacing energy that had previously been generated using fossil fuels.

Read in this issue how HUBER SE contributed to the success of the project by supplying two [two HUBER Disc Dryers RotaDry® 2050 M](#).

Yours,  
Georg Huber

**PRODUCTS AND SOLUTIONS**

**Germany's largest combined method for the removal of trace substances to date: fourth treatment stage in operation at the Uhdlingen-Mühlhofen association sewage treatment plant**

In August 2023, after more than two years of construction, one of the most cutting-edge systems for the removal of trace substances was successfully put into operation at the Uhdlingen-Mühlhofen association sewage treatment plant.
