

Commissioning of the Quaternary Treatment Stage at the Bickenbach Wastewater Treatment Plant (Hesse)

Successfully commissioned: The new quaternary treatment stage at the Bickenbach wastewater treatment plant cleans up to 150 l/s and reliably removes micropollutants – a milestone for water protection and drinking water quality in the Hessian Ried.

HUBER NEWS

EDITION 2 | 2025

Georg Huber,
CEO

Dear Mr. Schmid,

This issue focuses on sustainable innovations, showcasing the diverse possibilities for designing future-oriented water and wastewater solutions.

In [Lyon](#), six [HUBER RoWin wastewater heat exchangers](#) are setting new standards. They efficiently supply the new La Saulaie urban district with heating and cooling – a good example of how urban energy use can be rethought.

Far away, [on Vancouver Island in Canada](#), the 'Wolf Pack System' comprising [ROTAMAT® Ro9](#) and [GritWolf®](#) ensures clean wastewater and the sustainable protection of the Pacific Ocean.

Yours sincerely,

Georg Huber

HUBER Wastewater Symposium 2025 – “Wastewater Treatment of Tomorrow”

Under the motto “Wastewater Treatment of Tomorrow”, around 200 visitors discussed innovative technologies and the future of water management at the HUBER Wastewater Symposium 2025. A highlight was the keynote speech by Dr.-Ing. Lisa Broß, German Association for Water, Wastewater and Waste (DWA) Federal Managing Director.
